

# API / SSO

Synchronize Data and Expedite System Access Across Applications

Save your company **time and money** by utilizing an application programming interface (API) coupled with single sign-on (SSO) technology to **seamlessly connect** your systems with ours.

Single Sign-On (SSO) Technology

Securely Share Data Between BISTrainer & Your System

Automatic Alerts & Reporting

# Automate data synchronization so you can focus on what matters most.

## Application Programming Interface (API)

An application programming interface (API) is a means for allowing two or more systems to communicate. Using an API, your company can seamlessly transfer data between your systems and ours to automatically:

Create and remove users in **BIStrainer based** on your payroll system updates

Transfer **course completion data**, including scores, attempts, average times, and certificates

Assign **courses** to new user accounts

Add **company locations** and roles

## Single Sign-On

Single sign-on utilizes the login authentication process of one of your systems to gain instant access to ours. Single sign-on can be used with a variety of systems including your:

Company Intranet

Payroll System

Customer Relationship Management System

Social Networking Tools

Project Management Software

## Security

To security transfer data, our system requires an encrypted authentication token comprised of the following:

- ✓ **BIStrainer Key**  
Validates that access permission has been granted to our system
- ✓ **Company Identifier**  
Confirms which company the user belongs to within our system
- ✓ **Employee ID**  
Uniquely identifies each employee
- ✓ **Course ID**  
Determines which courses should be added to a user's account
